

Distinguished Lecture – Siegfried Müssig May 30th 2016

On May 30th 2016 the SPE student chapter in Clausthal was glad to welcome the German section chairperson Mr. Müssig for a distinguished lecture. The lecture was titled "Moving the Frontiers in Artificial Lift Technology in Mature Field Operations" and as the title says focused on different artificial lift technologies and how to apply them in mature oil fields. The lecture was attended by 25 students and seemed to pique the interest of everyone in attendance. The lecture was followed by an involved discussion between the students and Mr. Müssig, the event took approximately 2 hours. The success and popularity of the event lead to the conclusion to hold more distinguished lectures and invite more speakers to the university.
