

GSSPE General Assembly - 29.06.2017

On June 29th three students from Clausthal participated at the General Assembly of the SPE German Section in Celle. The meeting was held at the Baker Hughes area. Before the General Assembly students from Clausthal, Freiberg and Aachen had the opportunity to visit the Baker Hughes research and development facilities, followed by a common lunch break.

The General Assembly consisted of the Annual Report of the Chairperson, Oksana Zhebel, which was followed by the treasurer's Report by Christian Kiesel. Afterwards the Student Chapters from Aachen, Freiberg and Clausthal had to present themselves regarding their responsibilities and achievements over the last year. The Assembly was closed after the relief of the treasurer and the old board and the election of the new one.

Following the official part, awards were assigned for special achievements. Treasurer Christian Kiesel was awarded for his commitment in the GSSPE over the last years. The student chapter of Aachen won the Gold Award of the SPE. A student from Freiberg was awarded for his work in the final disposal of radioactive material in abandoned wells. And of course, special greetings to our fellow Erik Feldmann, who was also awarded for his very impressive Drillbot construction, which includes a MSE Calculation, a rock bit model and a bottom hole Assembly, all combined in a self-build construction with a rock layer sample.
