

Wintershall Company Presentation (Campus Interview) & YP - 26.10.2016

On October 26th 2016 Wintershall visited our campus in combination with interviews for their SPEAD program. The presentation with Young professional members was held the evening before the interview and provided an opportunity to ask questions about working at Wintershall and the environment in the SPEAD program. It was useful occasion to learn about the company as a potential employer and to learn about the training provided in the company. Several students were in attendance to express their interest and ask questions about the company.

The YP (Ruslan Taubaev) held a presentation about his experience and his expression about his first two years working in E&P and about how it is to be a fresh engineer on the field, especially on offshore.
