

Wintershall Dea's Company Presentation and Campus Interview, 19-20 November 2019

Wintershall Dea is a Europe's leading independent natural gas and crude oil producer that unites technological know-how and innovativeness. Wintershall Dea and SPE Chapter TU Clausthal have been establishing a good relationship in recent years. Wintershall Dea has been sponsoring and supporting every event and activity carried out by SPE Chapter TU Clausthal. Many of TU Clausthal alumni began their career in Wintershall Dea. A good relationship that we always want to maintain for the future.

On 19-20 November 2019, we again had the honor of being able to welcome Wintershall Dea to do a company presentation and a campus interview for their SPEAD program that gave an opportunity for students of TU Clausthal to know better about Wintershall Dea and the program. The company presentation was held on the first day in the Exxonmobil room at ITE TU Clausthal. The presentation was held by Young professional to introduce the working life and the environment in the Wintershall Dea. It was useful occasion to learn about the company as a potential employer and to learn about the training provided in the company. Several students were in attendance to express their interest and ask questions about the company. The interview for SPEAD Program was held on the second day.

We are very grateful for the opportunity we can get through the visit of Wintershall Dea to our campus. We hope that it will continue to be repeated in the future.

The pictures about this company presentation can be shown following.
